Find Out Who Is Behind The CurtainBy April DyntaxaThe author's expertise in laying things out in chronological order, and connecting the dots between people and incidences, made it possible for me to finally begin to understand these two world-changing events in my lifetime. Whether you read this as your first book in learning about these events, or whether like me, this is an additional book in a long line of narrative research, it is a must read. Over the past 50 years I have heard references to a "shadow government", black-ops, coup d'etat, Kennedy's intentions regarding foreign policy and the intelligence agencies in our government, but

like things seen peripherally I found it difficult to grasp the meanings. Mr. Guyenot's writing has evaporated the fog that kept me from getting a clear understanding of the books I have read and the ones that I will read. I am an American and I love my country---the land and the people---and it saddens me to find out about the destructive forces within our government. 26 of 28 people found the following review helpful. truly eye-opening. how can this not change minds? By isaac bickerstaff this is the first explanation i have read of the last half century that makes sense. check it out. there is a somewhat sloppy, work in progress "version" with mark gorton as the author on the web at https://wikispooks.com/wiki/Document:Fifty_Years_of_the_Deep_State this, as the comment below notes, is not the author of the book being reviewed here, but the work on wikispooks looks quite derivative of that book. any rate, i have now read the full book by the french engineer and am extremely impressed. great marshaling of facts, even-handed analysis, willingness to consider even seemingly "out there" solutions that fit the facts best (apple-sized atomic bombs instead of nano thermite to take down the towers, no real planes at all, only video images of them). how can such be true? yet how was molten metal in "ground zero" six months later? watch the "ghost plane" on the news video fly into a column of glass and steel with a tiny puff of smoke on collision, like a cartoon. watch the plane's intact nose project briefly beyond the building after passing through columns of steel. utterly defies logic and physics. you must read this to understand our times. 7 of 7 people found the following review helpful. By bossaboy Mr. Guyenot does a very nice job of connecting the vary disparate "dots" that interrelate to create our very convoluted modern "reality." There is a tremendous amount of research on particular pieces of the larger puzzle, but few works attempt to assemble some of those many important puzzle pieces into some comprehensible form. A very worthwhile addition to our "understanding" a modern events.

JFK-9/11 assembles the most significant and well-documented deep events of the last fifty years into a coherent narrative of the deep history of the United States and its sphere of influence. The result is both a concise introduction for newcomers (a deep history for dummies), and an insightful perspective for informed readers. Relying strictly on documented evidence and state-of-the-art JFK and 9/11 research, the book cuts through the layers of government and mainstream media lies, to expose the hidden powers at work in the Empires underground foreign policy. It documents the role of undercover and paramilitary operations, psychological warfare and disinformation campaigns, and above all false flag terror, in the course of world politics since the beginning of the Cold War, and increasingly since September 11th. The book is divided in two parts: the first deals with the underlying forces of the Cold War, the second with the driving forces of the War on Terror. The period investigated begins just before November 22, 1963 and peaks on September 11, 2001, the two deep events that weigh most heavily on the unfolding of American and world history. The author highlights their structural similarities, examines how one made the other possible thirty-eight years later, and follows the underlying thread leading from the one to the other, in the hope of anticipating and circumventing future atrocities.

About the Author Laurent Guynot was born in France in 1960. After graduating as an engineer from the cole Nationale Suprieure de Techniques Avances in Paris, and working in the armaments industry in the United States for two years, he turned to the study of religious history and anthropology. He has earned a PhD in Medieval Studies in La Sorbonne, Paris, and has since authored several groundbreaking books in French on medieval narrative anthropology, most recently *The Bleeding Spear* (2010) and *Fairy Death* (2011). He has also published an investigation into the psychological and social damage of mass pornography. He has been researching Americas deep history for the last four years, and has been a contributor to Voltaire.net. JFK-911 is his first book in English.
