Throwing new light on the "lost History" of the Golden Age of Islam By Antoine van Aghtmael Should be required reading in college or for any educated person as it highlights the "lost history" of the Golden Age of Islam around a thousand years ago when the House of Wisdom in Baghdad was an

early think tank, pulling together and preserving knowledge from India to Greece and sharing brainpower among scientists and intellectuals adding its own substantial advances in math, astronomy, medicine, geography, etc. a long period spanning centuries that is too important to be forgotten. 0 of 0 people found the following review helpful. Wonderful By parvaz Wonderful book! I enjoyed the fictional stories at the beginning of each chapter, connecting the present to past. As the author makes clear in the introduction, there are several schools of thought regarding the Islamic civilization, past and present status, and his goal is not to take a position in such debates, but "to adhere to established fact but bring the most important characters and events to life". 0 of 0 people found the following review helpful. Great read into science / innovation history By Customer Very well written and easily accessible. Walks through a great deal of history. Author organizes, empires, innovations and chronology beautifully to make it understandable and interesting

In an era when the relationship between Islam and the West seems mainly defined by mistrust and misunderstanding, we often forget that for centuries Muslim civilization was the envy of the world. Essential reading for anyone seeking to understand the major role played by the early Muslim world in influencing modern society, *Lost History* fills an important void. Written by an award-winning author and former diplomat with extensive experience in the Muslim world, it provides new insight not only into Islam's historic achievements but also the ancient resentments that fuel today's bitter conflicts. Michael Hamilton Morgan reveals how early Muslim advancements in science and culture lay the cornerstones of the European Renaissance, the Enlightenment, and modern Western society. As he chronicles the Golden Ages of Islam, beginning in 570 a.d. with the birth of Muhammad, and resonating today, he introduces scholars like Ibn Al-Haytham, Ibn Sina, Al-Tusi, Al-Khwarizmi, and Omar Khayyam, towering figures who revolutionized the mathematics, astronomy, and medicine of their time and paved the way for Newton, Copernicus, and many others. And he reminds us that inspired leaders from Muhammad to Suleiman the Magnificent and beyond championed religious tolerance, encouraged intellectual inquiry, and sponsored artistic, architectural, and literary works that still dazzle us with their brilliance. *Lost History* finally affords pioneering leaders with the proper credit and respect they so richly deserve.

"Mathematics, astronomy and medicine; those are three of the many disciplines that would not exist in their present form without the contributions of Muslim scholars and thinkers throughout the centuries. We in the West don't often remember that." Aaron Schachter, Anchor, BBC "The World" From the Trade Paperback edition. About the Author Michael Hamilton Morgan is the author of *The Twilight War*, and co-author with undersea explorer Robert Ballard of *Collision with History: The Search for John F. Kennedy's PT-109*, and *Graveyards of the Pacific*. A former diplomat, he created and now heads New Foundations for Peace, which promotes cross-cultural understanding and leadership among youth. He has appeared on ABC and CBS and as a Washington journalist covered foreign policy issues. From 1990-2000 he directed and advised the International Pegasus Prize for Literature.
