I have been following David Rohl, whose next effort was to have been a book tracing the Black Headed Ones who came from the

east and conquered Egypt and left many rock drawings in what is now the eastern desert. Waddell provides the answer--they came not from Sumer or Babylon, but from the Indus Valley, where the crown prince leading the expedition to Egypt had been holding a co-regency, but intended to rule Egypt in his own right. Not clear on whether he had attempted to rule the Indus region and was in flight. I did not find the book racist, altho the author talks about Aryan-Nordic rulers. The Indus region with its pre-Harappan culture is considered the birthplace of Aryan peoples. I'm not clear if the author meant for Nordic races to be the same as Aryan. But even the Bible indicates that warlike peoples came from the East--to me, that agrees with the Indus civilization. This is not a book about the origins of the Aryan civilization, however, but it essays to show that those warlike Sumerians conquered the entire world, from the Indus to Egypt, and ruled in a way that allowed them to maintain rulership for several generations. The author uses linguistics, royal seals, King-Lists, and Indian and Sumerian/Babylonian historical documents reporting the exact same events to back his theories convincingly. I found this book in an online search to find out if the Biblical Nimrod was Sargon the ruler, as someone tried to tell me. I'm not sure this particular book is any proof of that, especially since Nimrod was a black man, but it certainly offers a lot of interesting detail about what was probably the first generations-lasting world empire. The author notes that this empire eventually broke up as citizens revolted, perhaps in anticipation of the high king's death, just as all of them seem to do. Not an easy read, but quite fascinating and has a number of supporting books by this author on the same theme, including a dictionary. Hope to read more.

The rise of the Aryans or Sumerians, their origination and propagation of civilization, their extension of it to Egypt and Crete, Personalities and achievements of their kings. Historical originals of mythic gods and heroes with dates from the rise of civilization about 3380 B.C. reconstructed from Babylonian, Egyptian, Hittite, Indian and Gothic sources. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.
