Rachel Storm, Arthur Cotterell, David M. Jones, Brian L. Molyneaux : Mythology of the World (Three Copy Slipcase) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Mythology of the World (Three Copy Slipcase):

8 of 8 people found the following review helpful. Fantastic for research, just have a magnifying glass handy. By AnonymousI absolutely love this little series. I'm a painter who focuses on mythology and history. Since it's so overdone, I don't necessarily like to do the same old Greek, Roman, and Norse. So having a quick reference where I can get some ideas from other areas of the world is a fantastic tool to have. It's still pretty vague, but what I can do is get some inspiration on a certain topic, then go do some research to get the specifics. This and Giants, Monsters, and Dragons: An Encyclopedia of Folklore, Legend, and Myth are great for my work! The only problem that I have with this book and the reason that I took 1 star off is that the writing is TINY! Every eye doctor I've ever been too has told me that I have superior eyesight and still I had the worst time reading this. What is it? 6 point font? If they just made it

a bit bigger (or maybe if they came out with a Kindle version, I would have been 100% satisfied with these books. 2 of 2 people found the following review helpful. Informative By eSportsStream I am someone who loves Mythology and I recently got this to learn more about deities from different cultures. It is defiantly worth the read if you are into that sort of thing. The books come in a nice hard slipcase and the illustrations and pictures inside are nicely done. 0 of 0 people found the following review helpful. Five Stars By Mr. Bubles Very helpful on my research. I only suggest for people that are hard core into mythology to read this.

The myths and legends of four continents are vividly brought to life in illustrated encyclopedias that inform, delight and intrigue. The encyclopedia of classical mythology describes the central mythical figures of Ancient Greece and Rome, the Celtic heroes and the Nordic gods. The volume on the mythology of the American nations describes the belief systems, sacred spaces and rituals of the North American Indian and the Inuits, and of the Aztec, Inca and Maya nations. The guide to the myths of India, Egypt, China and Japan presents some of the most powerful and evocative mythologies and religions from the mystical Middle and Far East, with exciting tales of gods, spirits, demons and black magic. Each volume is structured in an instantly accessible A-Z format, with 1500 colourful photographs, maps and paintings.

About the Author Arthur Cotterell is the author of the best-selling Dictionary of World Mythology. Brian Molyneux PhD specializes in the human use of the landscape, art and ideology. David M Jones PhD has written many articles on Mesoamerican and South American art for the Macmillan Dictionary of Art. Rachel Storm is a journalist and author specializing in religion, alternative religion and spirituality.
