Douglas Frayne : Sargonic and Gutian Periods (2234-2113 BC) (RIM The Royal Inscriptions of Mesopotamia)
before purchasing it in order to gauge whether or not it would be worth my time, and all praised Sargonic and Gutian Periods (2234-2113 BC) (RIM The Royal Inscriptions of Mesopotamia):

1 of 1 people found the following review helpful. The series is great and essential reading for Assyriologists By E.Temen.Ni.Guru The series is great and essential reading for Assyriologists, In particular for those looking for sources that contain the Old-Akkadian dialect. the transliterations and philological and historical commentary will be useful for the scholar to build his knowledge of the period Unfortunately there are no Autographs or pictures of the tablets, meaning you can't check the work of the scholar's reading of a sign. Still, for practical purposes, this will be a

welcome addition in the library of any scholar. That being said, the text is a monograph for scholars and probably won't be of much use for the popular reader.

The time period covered by this volume extends from the accession of Sargon of Akkad to the end of the Gutian period (2334-2133 BC). In this corpus we find the first extensive use of the Akkadian language, in its oldest known dialect, for royal inscriptions. Nearly all the texts in this volume are recorded in that language; a few are in Sumerian, and four are bilingual. Invaluable for the reconstruction of the history of the period are a handful of large Old Babylonian tablets inscribed with collections of the Sargonic kings' triumphal inscriptions. Complete transliterations of the individual copies of these important documents appear for the first time in this volume. The introductions for the Sargonic kings include lists of all their known year names along with brief discussions of the major events of their reigns. A short introduction of each description gives its general contents and place of origin. There is a detailed catalogue of exemplars, along with a brief commentary, bibliography, and text in transliteration. In microfiche, 'scores' give transliterations of the individual exemplars of the inscriptions.
