Howard R. Turner : Science in Medieval Islam: An Illustrated Introduction before purchasing it in order to gauge whether or not it would be worth my time, and all praised Science in Medieval Islam: An Illustrated Introduction:

0 of 0 people found the following review helpful. Three StarsBy hjhuntNot quite what I expected. Little snapshots rather than a cohesive overall narrative of the accomplishments0 of 0 people found the following review helpful. Five StarsBy NathanLoved the book, it was an excellent read.0 of 0 people found the following review helpful. Five StarsBy javaid mahmoodVery good

During the Golden Age of Islam (seventh through seventeenth centuries A.D.), Muslim philosophers and poets, artists and scientists, princes and laborers created a unique culture that has influenced societies on every continent. This book offers a fully illustrated, highly accessible introduction to an important aspect of that culture—the scientific achievements of medieval Islam. Howard Turner opens with a historical overview of the spread of Islamic civilization from the Arabian peninsula eastward to India and westward across northern Africa into Spain. He describes how a passion for knowledge led the Muslims during their centuries of empire-building to assimilate and expand the scientific knowledge of older cultures, including those of Greece, India, and China. He explores medieval Islamic accomplishments in cosmology, mathematics, astronomy, astrology, geography, medicine, natural sciences, alchemy, and optics. He also indicates the ways in which Muslim scientific achievement influenced the advance of science in the Western world from the Renaissance to the modern era. This survey of historic Muslim scientific achievements offers students and general readers a window into one of the world's great cultures, one which is experiencing a remarkable resurgence as a religious, political, and social force in our own time.

"This book could well become the best means to introduce people to Islam's contributions to science, medicine, and philosophy.... The wonderful illustrations make it even more understandable." (Emory C. Bogle, Associate Professor of History, University of Richmond) "This book could well become the best means to introduce people to Islam's contributions to science, medicine, and philosophy.... The wonderful illustrations make it even more understandable." (Emory C. Bogle, Associate Professor of History, University of Richmond) About the Author Howard R. Turner is a documentary and educational film and television writer who served as Curator for Science for the major traveling exhibition "The Heritage of Islam, 1982-1983."
