From Early Korea Project, Harvard University : Society and State in Middle and Late Silla (Early Korean Project Occasional Series) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Society and State in Middle and Late Silla (Early Korean Project Occasional Series):

Volumes in the Early Korea Project Occasional Series focus on central issues related to the study of early Korea history and archaeology. The present volume addresses several seminal questions associated with the middle and late periods of the Silla kingdom (ca. 668-935): What was the composition of Silla's ruling elite? How did the state administer local areas? What was the relationship between the Buddhist church and the state? How did the government evolve over the course of the middle and late periods of Silla's rule? And what were the causes of Silla's demise?

About the Author Richard D. McBride II is associate professor of history at Brigham Young University Hawaii.
