Richard H. K. Vietor : Sun and Cross: From Megalithic Culture to Early Christianity in Ireland before purchasing it in order to gauge whether or not it would be worth my time, and all praised Sun and Cross: From Megalithic Culture to Early Christianity in Ireland:

4 of 4 people found the following review helpful. Great Introduction to Irish History By J - and then some The one thing I love about visiting Ireland the most is the various layers of history that are so evident in every town, county and countryside. It is, however, very difficult to find books that can adequately cover the early history of Ireland, especially the transition from various earth religions to Christianity. Sun and Cross does this, and I found it helpful, interesting and reflective of what I have seen and learned in Ireland. It is a very nice book. 0 of 0 people found the following review helpful. Five Stars By Doug L. extremely informative

This full-color gift edition presents an inspiring and fascinating work of Celtic spirituality. Beginning with the ancient sun-oriented monuments of the megalithic age, Jakob Streit traces an unbroken spiritual culture in Ireland from the time of its stone circles and dolmens through the Celtic era and into the period of the early Christian stone crosses. He describes the amazing missionary zeal of monks such as Columba, who established Celtic Christianity throughout Europe during the Dark Ages, until it was suppressed by the Church of Rome during the eighth century. Fully illustrated in color, this is a book to give and cherish.

'The republication of this book has been long-awaited. It includes a wonderful selection of photographs, illustrations, poetry and quotations. It is an essential sourcebook for anybody interested in Celtic spirituality and Celtic history.' -- Dara Molloy, *Aisling Magazine*, 2004 'A beautifully produced and highly informative book about the development and flowering of early Christianity in Ireland. A fascinating section on sun spirals explains their relationship to the cycle of the year and to incarnation and excarnation. An authoritative account conveying the spirit of the tradition.' -- *Scientific Medical Network*, Summer 2004 'There are lots of picture and diagrams of Ireland's fantastic ancient monuments and stone crosses. Engrossing'. -- Julie Chamberlain, *Coventry Evening Telegraph*, 5 June 2004 'Streit makes a good case for there being Irish Christians before St Patrick. This is a handsome book with plenty of photographs, [...] and the tragic story of the rise and fall of the Irish Church makes compelling reading.' -- *Northern Earth*, December 2005 About the Author is the Senator John Heinz Professor of Environmental Management at the Harvard Business School.
