subject that I do believe I have ever read in my whole life; I am a great granny and believe me, I have read MANY books!!! If only these truths can get 'out there' to the luke-warm feet-draggers in assume anyone can rehabilitate a centuries old edict: KILL JEWS AND CHRISTIANS! Interestingly, I often wondered what was on all of the college campus banner we can't read: and HE TELLS YOU in bloody details!!! So, you are not a Christian or Jew, but you can certainly get caught up on the horrendously bloody, serious conflicts!!! We certainly do not believe that those videos we see are photos-shopped - DO WE???16 of 17 people found the following review helpful. Compelling EvidenceBy savvygrandmaThis book is absolutely filled with documented information regarding the infiltration and activities of Islamic activists/radicals in North America and Western Cultures. I have heard criticism of Walid Shoebat from those trying to discredit him, saying that they can't find evidence that he was a Palestinian Terrorist, but to me that is immaterial. He understands the Middle Eastern cultures, geography, history, languages, and the Koran. As a Christian myself, I find his writings to be compelling evidence that the Ottoman Empire is rising again, is a grave threat to the USA and that we do need to wake up and get over being Politically Correct. It is appearing that "Jihad by the Word" will be our undoing.I wish that there was a way for all of these unpronounceable (to me) names to be cataloged or outlined in a quick reference guide. I am thinking of rereading the book and writing my own to reference as listen to and read the News.This is not light reading, but needs to be seriously considered and shared with our loved ones. I, for one, do not want to be subjected to Sharia Law.56 of 60 people found the following review helpful. The Red Flags Are UpBy Mark SutterThis is quite an eye-opening book--even if you've been keeping up to speed with radical Islam. I had trouble getting through the first 15 chapters even though the information presented was interesting. My problem was that there were so many Arabic names mentioned that there was no way to keep track of who was doing what. The later chapters were much more enjoyable because the authors started revealing the Islamic infiltration into our government. And just so there are no accusations that this is a right-wing hatchet piece, both parties have been hoodwinked for decades by misleading Islamic tactics although Jimmy Carter comes across as the biggest fool of all the government officials mentioned. After reading this book, my biggest fear is that I don't see any way to stop this quest for a worldwide caliphate.

Since the Muslim Brotherhood established itself in the US through various groups, it has sought to exploit America's weakness - a sensitivity with respect to civil rights.
