For example, I am currently developing a data base, upon which to write a paper to present at a political science conference. This Factbook is one source for the data set that I am building. Thus, this work actually has value to me as an academic political scientist.Common items are developed for all countries, so that one can, for instance, compare educational level attained by citizens (average).All in all, a good investment from my perspective.3 of 3 people found the following review helpful.
