Christopher Ehret : The Civilizations of Africa: A History to 1800 before purchasing it in order to gage whether or not it would be worth my time, and all praised The Civilizations of Africa: A History to 1800:

2 of 2 people found the following review helpful. An incredible introduction to the empires and nations of Africa ...By RogerAn incredible introduction to the empires and nations of Africa which existed pre-colonization period. I had not realized that 500 year old empires had risen and fallen in Africa long before Europe felt the need to "improve" it.1 of 1 people found the following review helpful. the best of the survey African history booksBy LVRThis is not fiction and none of the questions about mood, plot, pace and character are applicable. The Civilizations of Africa is, I think, the best of the survey African history books. It suffers from the usual problem of the type: too much information to cover and at the same time from a problem specific to African history - there are huge lacunae, enormous areas unknown. The scholarship is good; the approach is thoughtful. Highly recommended.0 of 0 people found the following review helpful. Five StarsBy Devin FrankI love this book

Since its initial publication, *The Civilizations of Africa* has established itself as the most authoritative text available on early African history. Addressing the glaring lack of works concentrating on earlier African eras, Christopher Ehret's trailblazing book has been paired with histories of Africa since 1800 to build a full and well-rounded understanding of the roles of Africa's peoples in human history. Examining inventions and civilizations from 22,000 BCE to 1800 CE, Ehret explores the wide range of social and cultural as well as technological and economic change in Africa, relating all these facets of African history to developments in the rest of the world. This updated edition incorporates new research, as well as an extensive new selection of color images.

Challenging and innovative... thorough and masterful... One hopes that Christopher Ehret has initiated a new trend in the writing of African history textbooks, one that challenges previously accepted chronologies and ideas and presents us with an interpretation that connects social, economic, political, and cultural history. (African Studies)Challenges historians to rethink how they teach the African past.... Ehret goes boldly where no writer of an African history textbook has ever gone before.... [The book] has convinced me teachers should stress the deep past, the past that produced the intellectual, cultural, and yes spiritual resources that are the bedrock hope of an Africa battered by the past few centuries. (International Journal of African Historical Studies)An authoritative and strikingly original overview of African history up to 1800, written at a level that will be accessible to entering college students. (Patrick Manning, Northeastern University, author of *Migration in Modern World History, 1500-2000*)With this text, Christopher Ehret provides a compelling account of early African history suitable for undergraduates and those without background in the field, updating the first edition (2002) with recent research.... Anyone who has taught a survey course about Africa knows that the sheer scale of the undertaking is a significant challenge, but Ehret's narrative moves back and forth easily between big-picture developments and close-to-the-ground details. (The International Journal of African Historical Studies)About the Author Christopher Ehret is Professor of History Emeritus at the University of California, Los Angeles, and the author of *An African Classical Age: Eastern and Southern Africa in World History, 1000 B.C. to A.D. 400* (Virginia).
