Jonathan Laurence : The Emancipation of Europe's Muslims: The State's Role in Minority Integration (Princeton Studies in Muslim Politics) before purchasing it in order to gage whether or not it would be worth my time, and all praised The Emancipation of Europe's Muslims: The State's Role in Minority Integration (Princeton

Studies in Muslim Politics):

Winner of the American Political Science Association's 2013 Hubert Morken Prize for Best Book in Religion and Politics and its 2013 Prize for Best Book in Migration and Citizenship

The Emancipation of Europe's Muslims . . . looks at the largely unnoticed ways in which European governments have begun to integrate Muslims and Muslim organisations into public life. . . . Relying on extensive research and a wide range of interviews, Mr. Laurence has written an original and thought-provoking study. -- The Economist Perhaps the subtlest and most solidly researched analysis of European policies toward Islam It is too early to know whether this will defuse the cycle of exclusion and violence entirely, but Laurence establishes firm ground for hope. - Foreign Affairs[A] reference volume on the policies that governments across Western Europe have adopted in their attempts to better integrate Muslim communities Read [it] and decide for yourself. In the face of changing populations with a sometimes concomitant growth in religious extremism, do host nations clamp down or accommodate? - Washington Times From the Back Cover "Jonathan Laurence has written a remarkably accurate and comprehensive study of European Islam that transcends clichs and polemics. He brilliantly elucidates the long-term trends that are transforming the children of migrants into European Muslims, acknowledging the tensions as well as the achievements of the process."--Olivier Roy, European University Institute, Florence "Laurence's book is a splendid comparison of the management of religious--and especially Islamic--conflict in France, Italy, and Germany. Laurence arrays a range of convincing material to show that these countries followed similar pathways in managing their relations with Islam. The book holds out hope that Muslims may eventually be integrated within the political communities of these major European nations."--Sidney G. Tarrow, Cornell University
