**Graham Phillips : The End of Eden: The Comet That Changed Civilization** before purchasing it in order to gage whether or not it would be worth my time, and all praised The End of Eden: The Comet That Changed Civilization:

2 of 2 people found the following review helpful. A modern day theory for an ancient catastropheBy J. BrandonI was intrigued by the theory put forth regarding a comet catastrophe in the time of the Garden Of Eden, and the author did a fine job of linking events with possibilities of what we know in modern times of astrophysical studies. Comets are throughout the ancient biblical, as well as other, authoritative writings....in all major cultures, both past and present. I thought the argument for his theory was quite plausible, and may answer questions regarding additional mysterious

'disappearances' of other physical areas, that modern scientific 'authorities' continue to disregard as mere myths.<sup>2</sup> of 2 people found the following review helpful. This book makes an excellent case for one such event  
By John D. Gonzales-  
Worth a read! I have long believed a comet/asteroid strike(s), or near strike, is the secret to unraveling much of earth's history and why without that acceptance we will never really understand just exactly who we are or what our place is in the universe. This book makes an excellent case for one such event.<sup>1</sup> of 1 people found the following review helpful. Interesting  
By Peter christie  
If you are a fan of megalithic civilizations, this is another perspective certainly there are many valid points in this book to consider.

Presents compelling evidence that civilizations worldwide became warlike and monotheistic after Earth passed through the tail of a comet in 1500 B.C. Explores the violent effect of debris from comet 12P/Pons-Brooks on peaceful cultures such as the Olmec of Mexico and the Megalithic people who built Stonehenge Shows how this comet's appearance was taken as a significant religious event that still has repercussions today In the year 2024, the comet 12P/Pons-Brooks is due to pass near Earth again for the first time in 3,500 years. In 1500 B.C., Earth passed through this comet's tail, and in the decade following, cultures the world over began to exhibit significant aggressive tendencies. Civilizations in India, the Middle East, China, Japan, Europe, and Central America suddenly abandoned their peaceful ways and devoted themselves with uncharacteristic fervor to making war on their neighbors and fighting among themselves. But this was not the only effect that is linked to this celestial event. Sudden outbreaks of monotheism--the worship of a single god, and a new idea at the time--occurred simultaneously in locales spread widely throughout the world. Most of these monotheistic religions represented their god symbolically as a circle with a series of lines extending below--resembling a simple drawing of a comet. In *The End of Eden*, Graham Phillips chronicles the sudden shifts in social demeanor and religious philosophy that swept the world in the wake of 12P/Pons-Brooks. He argues that there is no other explanation for these changes other than the presence of this massive comet in the skies above Earth. He contends that debris in the comet's tail contaminated the atmosphere with a chemical known to cause aggressive behavior, and that after little more than a decade, worldwide hostility abruptly abated. He also explores how the appearance of a celestial body that outshone the moon would have been interpreted as a significant religious event--the premier appearance of a powerful new god to supplant the deities previously worshipped around the world.

Graham Phillips argues persuasively that Earth encountered a massive comet 3,500 years ago around the time of the Exodus from Egypt. The object appeared twenty times larger than the full moon and was by far the largest comet sighting ever recorded by ancient historians. The worldwide consequences for mankind were devastating. Our own scientific research confirms that the author's theory is completely credible. (Allen West, coauthor of *The Cycle of Cosmic Catastrophes*)an extraordinary tour de force . . . (Lynn Picknett and Clive Prince, authors of *The Templar Revelation* and *The Sion Revelation*)In an extraordinary tour de force, Graham Phillips pinpoints a major mystery with important implications for our understanding of the remote past and the origins of ancient religion. Painstakingly researched and soberly presented--but never less than eminently readable--this book provides an answer so explosive that it should instantly ensure itself a place among the great revelations of history. (Lynn Picknett and Clive Prince, authors of *The Templar Revelation* and *The Sion Revelation*)This is a very exciting and important book, which suggests a highly plausible reason why organized cruelty seems to have come into the world at a surprisingly late date. I believe Graham Phillips's ideas are going to cause widespread controversy. (Colin Wilson, author of *The Outsider and Atlantis and the Kingdom of the Neanderthals: 100,000 Years*)"An intriguing 'must' new age collection will relish." (The Midwest Book , Sept 2007)"The theory {Phillips} puts forth in *The End of Eden* is nothing short of paradigm-shattering, if true." (Fate, Sep 2007)"The material in this work is well-organized. The author's style is very readable and accessible to non-experts. For those wishing to delve deeper into source materials, there are excellent endnotes and a full bibliography." (Jennifer Hoskins, *New Dawn*, Mar/Apr 2009)From the Back Cover  
ANCIENT MYSTERIES / EARTH CHANGES
