Considered an ethnographic classic. Victor Turner, a professor at Cornell, was known for his work in both anthropology and the behavioral sciences. These essays go far beyond meticulous recording of Zambian ritual to examine the role of symbols in social processes. Topics include medicine, witchcraft, morality, social structure, rites of passage, color classification, and the role of symbols in so many aspects of tribal life. Photographs, charts, and lists.

Turner writes a classic of what it means to successfully complete an ethnographic study. What my professors did to better explain this work (centered on Zambia) is build upon it to show how the Western world has captured and portrayed the modern Olympics. The role of symbols in social processes is better understood by this reader because of Turner.

Book by Turner, Victor

"This is a collection of ten essays dealing with various aspects of symbolism and ritual among the Ndembu of Zambia in central Africa. . . . Using data of extraordinary richness, it presents some of the most provocative and suggestive theories recently advanced in the study of ritual behavior and symbolism. . . . It provides one of the few postwar studies sure to rank as an ethnographic classic."Africa
"A collection of ten of the most brilliant and important essays on ritual yet written. These papers by Victor Turner . . . are all seminal and distinguished."American Anthropologist
