CustomerIt's time to rise to the next level and Calleman does an excellent job in making us up for the task.0 of 0 people found the following review helpful. Great follow on to the "Purposeful Universe"By Mark GottfriedDr. Coleman presents a very compelling treatise on evolution and the rise of civilization. But, how the Mayans were able to tap into the cosmic wave timeline and other cultures were not is not clear.

How the global mind drives the evolution of both consciousness and civilization Explains how our brains receive consciousness from the global mind, which upgrades human consciousness according to a pre-set divine time frame Reveals how the Mayan Calendar provides a blueprint for these consciousness downloads throughout history Examines the mind shift in humans and the development of pyramids and civilization in ancient Egypt, Sumer, South America, and Asia beginning in 3115 BCEIn each culture the origins of civilization can be tied to the arising of one concept in the human mind: straight lines. Straight and perpendicular lines are not found in nature, so where did they come from? What shift in consciousness occurred around the globe that triggered the start of rectangular building methods and linear organization as well as written language, pyramid construction, mathematics, and art?Offering a detailed answer to this question, Carl Calleman explores the quantum evolution of the global mind and its holographic resonance with the human mind. He examines how our brains are not thinking machines but individual receivers of consciousness from the global mind, which creates holographic downloads to adjust human consciousness to new cosmological circumstances. He explains how the Mayan Calendar provides a blueprint for these downloads throughout history and how the global mind, rather than the individual, has the power to make civilizations rise and fall. He shows how, at the beginning of the Mayan 6th Wave (Long Count) in 3115 BCE, the global mind gave human beings the capacity to conceptualize spatial relations in terms of straight and perpendicular lines, initiating the building of pyramids and megaliths around the world and leading to the rise of modern civilization. He examines the symbolism within the Great Pyramid of Giza and the pyramid at Chichn Itz and looks at the differences between humans of the 6th Wave in ancient Egypt, Sumer, South America, and Asia and the cave painters of the 5th Wave. He reveals how the global mind is always connected to the inner core of the Earth and discusses how the two halves of the brain parallel the civilizations of the East and West.Outlining the historical, psychological, geophysical, and neurological roots of the modern human mind, Calleman shows how studying early civilizations offers a means of understanding the evolution of consciousness.

In *The Global Mind and the Rise of Civilization*, Carl Johan Calleman formulates a unique outlook on human civilization, one that is deeply rooted in metaphysical changes in human consciousness. The effect is to reconcile diverse aspects of symbolism, myth, and theology, drawn from a wide range of ancient cultures. (Laird Scranton, author of *The Science of the Dogon* and *Point of Origin: Gobekli Tepe and the Spiritu*)Calleman examines how the two hemispheres of the brain have parallels with the East and West civilizations and suggests that the global mind is connected to the Earth's inner core. fascinating book. (Nexus Magazine, August 2016)The first novel idea about the rise of civilization in many decades. (James Redfield, author of *The Celestine Prophecy* and *The Twelfth Insight*)*The Global Mind and the Rise of Civilization* addresses one of the crucial issues of our time, on which our future may depend: the relationship between human consciousness and the brain. The evidence shows that mind and brain are not identical, as we have been led to believe. Minds are capable of things that brains cannot do. The implication--that we are more than our physical brains and bodies--will likely be regarded as the most important discovery of our era. Let Calleman be your guide on this exciting journey. (Larry Dossey, M.D., author of *One Mind: How Our Individual Mind Is Part of a Greater Consciousness* a)From the AuthorThis is the first volume of a trilogy with the focus of liberating ourselves from the shadows of the mind. In order to do so we have to know what the mind is and where it comes from. This book, which outlines this origin, came about as inspired by the shift of the ages in the Mayan calendar and presents a new theory as to what has caused the rise of human civilization. In my own view it is the most important book I have written so far and, as befits a paradigm shift, I am almost certain that no one has heard these ideas before.About the AuthorCarl Johan Calleman holds a Ph.D. in physical biology from the University of Stockholm. A leading expert on the Mayan Calendar, he is the author of *The Mayan Calendar and the Transformation of Consciousness* and *The Purposeful Universe*. He lives in Santa Fe, New Mexico.
